	Any Other Asian Background	

Black or Black British	Caribbean	
	African	
	Any Other Black Background	
Any Other Ethnic Group	Chinese	
	Any Other Ethnic Group	
I do not wish to state my baby's ethnicity		

NHS Summary Care Record

Your child's NHS electronic Summary Care Record (SCR) contains important information about their health. NHS doctors and nurses treating your child anywhere other than at your doctor's surgery may ask if they can look at this information to help them treat your child quickly and safely, as they won't necessarily know about what has happened to their health in the past. If they do not know about your child's previous care, their SCR can help people caring for your child to:

- Avoid errors, because they can see their medications, allergies or which medicines make your child ill
- Make better and safer decisions on how best to treat your child

You can choose to have other information added to your child's SCR which will enhance the care your child receives from doctors and nurses. This information includes:

- Any illnesses and any health problems your child has had
- Operations, medical procedures and vaccinations your child has had
- How you would like your child to be treated
- What support for your child's care you might need
- Who should be contacted for more information about the care your child needs

If you would like this information added to your child's SCR then please complete the following information.

Signed for (Parent/Legal Guardian): _____

Alternatively if you wish to opt out of the NHS Summary Care Record on behalf of your child completely and not share their GP record information with other NHS doctors and nurses, then please tick this box:
